

A Royal Futura Portable is for showing the teacher you really care about your work.

Throw away that apple. Or make a pie with it or something. Here is a really solid way to let the teacher know you care: turn in a few homework papers thoroughly thought out on a sleek-and-rugged Royal Futura. This portable, you see, makes much better schoolwork possible than any other way of writing. For *it is the only portable with all the automatic features of big standard office typewriters*. This allows more thinking to go into what is being written, less into the hum-drum mechanics of getting it on paper. Remember: you are just not getting a *complete* portable—unless you're getting a Royal Futura.® (Smart, luggage-type case included.)
